

Benefits

Earth Mover Tires, which represent the highest single cost factor for the operation of a wheeled unit, are sensitive to cuts, punctures and other damage. Their high value and world-wide-shortage means that pewag Tire Protection Chains solve many of these problems by providing the following advantages:

lower direct hourly operating costs by

- multiplied tire life leading to a significant reduction in tire costs
- predictable service life of tires and chains
- accurate budgeting
- minimal down-time due to tire failure
- maximum equipment availability
- improved stability, increased traction and better penetration for digging and break-out
- increased productivity in tonnages per hour

additional benefits:

- optimum tire protection - reduced tire maintenance
- protection plus traction with chain use - safe operation even in the worst conditions (on rock, fire and ice)
