

## **INDUSTRIES SERVED BY DOMITE®**

**Domite®** can be used in all high wear areas. We have found applications for Domite® in a wide variety of industries, but all have the same basic criteria where the use:

- is subject to high abrasion and impact rates
- maintaining continuous operations is essential and unscheduled downtime is not acceptable.
- difficult/dangerous access or a lack of maintenance availability.

The typical industries Domite® has proven successful in the past are:

Mining – Ore, Coal, Precious Stones, Potash, Energy (Oil, Uranium)  
Aggregate – Sand, Fine, Coarse, Heavy  
Concrete – Mixing, Moving  
Construction – Digging, Moving, Drilling  
Agriculture  
Earthmoving  
Dredging  
Steel Making – Coking Operations, Run-Out Applications  
Crushing  
Recycling Industries  
Mineral Processing Industries  
Quarrying

### **Remember:**

- Domite® reduces downtime and extends the life of equipment and facilities.
- Domite® reduces the maintenance costs.
- Domite® reduces lost production time.
- Domite® reduces cost per ton
